

XUAN LIU

Scripps Institution of Oceanography, University of California San Diego
Tel: +1 3147950718 | E-mail: xul047@ucsd.edu

EDUCATION

Washington University in St. Louis

Ph.D. Energy, Environmental & Chemical Engineering
• Supervisors: Prof. Jay Turner & Prof. Randall Martin
• GPA: 3.96/4.00

St. Louis, Missouri, USA
2019 – 2024

Xiamen University

B.S. Chemical Engineering and Technology
• Overall GPA: 3.86/4.00; Major GPA: 3.94/4.00
• Rank: 1/60

Xiamen, Fujian, China
2015 – 2019

RESEARCH EXPERIENCE

Postdoctoral Scholar at University of California San Diego, Advisor: Amato Evan

- Assess the impact of dust from ephemeral lakes on Earth's weather and climate using the newly developed soil mineralogy dataset from NASA's Earth surface Mineral dust source InvesTigation (EMIT) mission (2024 – present)
- Examine changes in exposure to playa dust and associated health risks as the Salton Sea continues to shrink using the Weather Research and Forecasting Model with Chemistry (WRF-Chem) (2025 – present)

Graduate Research Assistant at Washington University in St. Louis, Advisors: Jay Turner & Randall Martin

- Investigated the characteristics of airborne dust and trace elements in Uzbekistan with measurements from filter samples, low-cost sensors, and soil samples (2022 – 2024)
- Examined the attenuation effect due to particle size and mass loading for crustal elements in X-ray Fluorescence analysis of ambient particulate matter samples (2022 – 2024)
- Developed the methodology and explored implications for elemental analysis of ambient particulate matter samples from the global Surface PARTiculate mATter Network (SPARTAN) (2021 – 2023)
- Developed and evaluated a global-scale mineral dust equation with region-specific coefficients for estimating dust mass (2020 – 2022)

Undergraduate Research Assistant at Xiamen University, Advisors: Qiugen Zhang, Gaofeng Zheng, & Song Tu

- Developed a new type of side-chain-type polymer anion exchange membranes for fuel cells (2017 – 2018)
- Applied electrospinning to prepare polymer nanofibers for heavy metal ion adsorption (2016 – 2018)
- Investigated optimal purification conditions of 2-imidazolidinone (2016 – 2018)

PRESENTATIONS

- EMIT Science and Applications Technical Interchange Meeting (2026), *Using EMIT to Improve the Representation of Dust and Assess Its Impacts with WRF-Chem*. Pasadena, CA. **Talk**.
- American Geophysical Union Fall Meeting (AGU 2025), *Comparison of soil mineralogy from EMIT imaging spectroscopy and ground-based measurements in the deserts of southern California*. New Orleans, LA. **Talk**.
- EMIT Science and Applications Technical Interchange Meeting (2025), *Comparison of Soil Mineralogy from EMIT Remote Imaging Spectroscopy and Ground-Based X-ray Diffraction Measurements in Southern California Deserts*. Pasadena, CA. **Talk**.
- American Geophysical Union Fall Meeting (AGU 2024), *Assessing Attenuation Effects in X-ray Fluorescence Analysis of Light Elements in Mineral Dust for Ground-Based Measurements*. Washington, D.C. **Poster**.
- American Geophysical Union Fall Meeting (AGU 2023), *Elemental Composition of Fine Particulate Matter in Central Asia: Dust and Trace Elements in Tashkent, Uzbekistan*. San Francisco, CA. **Poster**.
- American Association for Aerosol Research Annual Conference (AAAR 2023), *Elemental Characterization of Ambient Particulate Matter for a Globally Distributed Monitoring Network: Methodology and Implications*. Portland, OR. **Talk**.
- The 4th International Surface PARTiculate mAtter Network (SPARTAN) Meeting (2023), *Advances in elemental characterization with the XRF*. St Louis, MO. **Talk**.
- American Geophysical Union Fall Meeting (AGU 2022), *Elemental Characterization of Ambient Particulate Matter for a Globally Distributed Monitoring Network: Methodology and Implications*. Chicago, IL. **Talk**.
- American Association for Aerosol Research Annual Conference (AAAR 2021), *A Global-scale Mineral Dust Equation*. Virtual. **Talk**.
- Atmospheric Optics: Aerosols, Visibility, and the Radiative Balance Conference (2021), *A Global-scale Mineral Dust Equation*. Bryce Canyon, UT. **Talk**.

- American Geophysical Union Fall Meeting (**AGU 2020**), *A Global-scale Mineral Dust Equation*. Virtual. **Poster**.

SELECTED AWARDS & HONORS

- Second Prize in the 26th annual Graduate Research Symposium, Washington University in St. Louis Graduate Student Senate and Graduate Professional Council, 2021
- Outstanding Graduate, Xiamen University, 2019
- National Scholarship, Ministry of Education of P. R. China, 2017 & 2018
- National First Prize in the 12th National Undergraduate Chemical Design Competition, National Undergraduate Chemical Design Competition Committee, 2018
- Merit Student, Xiamen University, 2016 – 2019

TEACHING & ADVISING EXPERIENCE

Teaching Assistant at Washington University in St. Louis

Air Quality Engineering with Lab (Fall 2022); Kinetics and Reaction Engineering Principles (Spring 2021); Unit Operations Laboratory (Fall 2020)

Student Mentor at Washington University in St. Louis

Research mentor for graduate students (Yingxi Lu, Xinying Wang, Yuxuan Ren) and undergraduate students (Caroline DeLuca, Yuanlong Su)

PROFESSIONAL ACTIVITIES & SERVICE

- **Committee Member**, University of California Dust Symposium, 2026
- **Session Chair**, AAAR Annual Conference, 2023
- **Site Manager**, SPARTAN Network, overseeing six sites in Abu Dhabi, UAE; Dhaka, Bangladesh; Mexico City, Mexico; Seoul, South Korea; Sherbrooke, Canada; and Ulsan, South Korea, 2022–2024
- **Journal Reviewer**, Atmospheric Chemistry and Physics, Aerosol Science & Technology, GeoHealth

OUTREACH

- San Diego County Office of Education STEM Design Team Summer Academy — Engaged K–12 educators and Student Fellows through a research presentation and hands-on field-study demonstration, introducing participants to scientific instrumentation and environmental research methods, 2026
- WashU Center for Aerosol Science and Engineering (CASE) Student Chapter Committee — Organized events and activities to foster student engagement, professional development, and knowledge exchange in aerosol science, 2023–2024

TECHNICAL SKILLS

- Field and analytical methods: Portable In-Situ Wind EROsion Lab (PI-SWERL), ambient particulate matter sampling, X-ray Fluorescence (XRF), Inductively Coupled Plasma Mass Spectrometry (ICP-MS)
- Atmospheric modeling: Weather Research and Forecasting Model with Chemistry (WRF-Chem)
- Programming and data analysis: R, Python, MATLAB
- Geospatial and remote sensing: ArcGIS, ENVI
